

The Great Wall Street Fortune Hunt

"When it's a question of money, everyone is of the same religion."

Voltaire

THE GREAT WALL STREET FORTUNE HUNT is an authentic computerized model of the real investment world. The opportunities for investment in the game represent the thousands of alternatives available on the various exchanges.

You'll find conservative blue chips like IBM (International Business Machines Corporation) and high risk high flyers like WOW (Wildcat Oil Western). You'll find the fast food industry represented by McDonald's Corporation and high technology manufacturers represented by Texas Instruments.

Each of the companies available for investment not only represents itself but other similar companies as well. Therefore the Standard Oil Company (Indiana) also represents Shell, Mobil, Arco and the other large petroleum companies.

Each of the investments has a different sensitivity to the news flashes which come across the TV screen. For example—some investments will go up at a time of world crisis and others will go down. The inherent sensitivity of each investment to the various categories of news is graphically displayed on the gameboard.

Your ultimate objective is to anticipate investment fluctuations swiftly enough to take full advantage of the many buying and selling opportunities which will occur in a different way every time you play.

The rules of The Great Wall Street Fortune Hunt are designed to replicate real life as closely as possible. You can play it at four levels. It is highly recommended that you feel thoroughly comfortable at one level before incorporating the next level as part of the game. Have fun! Make money!!!

Master Strategy
Gameboard

Game Components

1 Odyssey²
Expanded Memory
Game Cartridge

2 Investment Record Pads &
Option-Pricing Calculators

The Basic Game

1. The Great Wall Street Fortune Hunt can be played by one or more people. If more than two people are playing, the players divide into teams representing investment syndicates.

2. Each investor (or investment syndicate) starts out with \$100,000.

3. Each investor or investment syndicate can enter a maximum of seven investments into the computer.

Players with a net worth of \$100,000, or more may have as many as 3 investments at any one time entered in the computer.

Players with \$200,000, or more may have as many as 4 investments at any one time entered in the computer.

Players with \$300,000, or more may have as many as 5 investments at any one time entered in the computer.

Player's NET WORTH	Player's maximum NUMBER OF INVESTMENTS
\$25,000 to under \$100,000	2 INVESTMENTS
\$100,000	3 INVESTMENTS
\$200,000	4 INVESTMENTS
\$300,000	5 INVESTMENTS
\$400,000	6 INVESTMENTS
\$500,000 or more	7 INVESTMENTS

Players with \$400,000, or more may have as many as 6 investments at any one time entered in the computer.

Players with \$500,000, or more may have as many as 7 investments at any one time entered in the computer.

If a player's net worth falls below \$25,000... no new investments may be entered into the computer. Only SELL orders can be executed.

A player with a net worth of more than \$25,000, but less than \$100,000, is limited to 2 investments in the computer at any one time.

The time frame marker indicates the game is now in the second year, 3rd quarter.

4. Play is divided to represent a time span of five years.

Each year is divided into four quartered periods. Approximately 5 minutes of computer time is equal to one quarter (3 months).

Advance the time frame marker on the gameboard by one position each time the computer signals the end of a quarter.

Buy and sell orders are entered into the computer thru your Odyssey² alpha-numeric keyboard.

5. All investments entered in the computer must be sold at the end of each year.
(Four quarters.)

6. A player's total investment may not exceed his or her net worth.

Players may audit each other's holdings at any time. The penalty for investing more than a player's net worth is a fine of double the discrepancy and the loss of buying and selling privileges during the entire quarter following the audit.

7. The winner is the investor (or syndicate) accumulating the greatest net worth after five years (twenty quarters).
Shorter or longer games may be played if agreed upon in advance.

Start-up

Important! Always be sure that the power to your Odyssey² console is turned off before inserting a game cartridge. This protects the electronic components and extends the life of the unit.

To begin

1. Insert the cartridge into the slot of the Odyssey² console with the label side of the cartridge facing the alpha-numeric keyboard.

2. Turn on the power by pressing the power button of the console. SELECT GAME will appear on your TV screen. If it does not, press the RESET key on the alpha-numeric keyboard.

3. Press 0 on the numeric section of the Odyssey² keyboard.
4. Investment choices and current price per share will travel across the top of your TV screen.
5. Up-to-the-minute news flashes will travel across the center of your TV screen.

6. The bottom of the screen displays each player's Computerized Investment Portfolio which keeps track of player's investment and capital.
7. The bar chart reflects the over-all market performance during each quarter of a year.
8. If more than two people are playing, divide into teams. There will be plenty of action for everyone.

Level One STRAIGHT INVESTMENT TRANSACTIONS

Player one's Computerized Investment Portfolio indicates \$100,000 start-up capital.

Player one has "scrolled" to Position #2, an open account in the portfolio.

The Rules of the Game (1 or more players)

1. All investment transactions are entered into the computer through the keyboard.

2. The players' Computerized Investment Portfolios are located at the bottom of the television screen. Only one player's portfolio is displayed on the screen at a time.

Each Investment Portfolio has eight positions.

3. Move the joystick of your hand control to the left to gain access to your Investment Portfolio. You are now in position #1.

The left hand control activates player one's portfolio that shows up in Money Green on color TV*.

The right hand control activates player two's portfolio that shows up in Bullion Gold.

*Colors may vary according to individual TV's color adjustments.

4. Each player has access to eight positions in the Investment Portfolio.

Position #1 displays the balance in the player's portfolio account. Each player starts off with \$100,000.

Positions #2 thru #8 are for entering the player's investments in the portfolio.

Push the joystick forward to move or "scroll" past position #1. Pull the joystick towards you to "scroll" in reverse.

5. To buy an investment, use the joystick of your hand control to scroll to an "open" account (positions 2 thru 8). The news flashes will disappear from the center of your screen.

Enter your investment by typing the letters representing your selection on the keyboard.

Example

WHL = WESTERN HOLDINGS, LTD.

Player one's investment choice is WHL. 500 shares at \$50. per share would cost \$25,000.

6. Enter the number of shares desired on the numeric section of the keyboard. Shares are available in lots of 100 up to 9900 shares.

The latest market price per share will be displayed at the far right of your portfolio. This figure will be updated until the time you signal the computer to make the buy.

Enter the first two digits of the number of shares desired. If the figure is less than 1000, enter 0 and then the second digit. (Example: five hundred shares is expressed as 0500.)

7. Press ENTER on the keyboard to execute the buy order. The news flashes will reappear on the screen. (If you change your mind about buying the shares, press CLEAR instead of ENTER. The question marks will reappear and your account is ready for a new entry.) The price paid per share will remain in your portfolio to serve as reference during the game. **Important!** Data which has not been entered or cleared will be displayed in every open account in both portfolios. **Be sure to press ENTER or CLEAR before going to another open account in either portfolio.**

8. If you make an error entering the investment symbol, press CLEAR and then follow with the correct three letter entry. The question marks will not appear when you press CLEAR. The computer will signal an incorrect investment entry by continuing to display question marks when you enter the number of shares desired.

9. To sell an investment, use the joystick of your hand control to scroll to the desired position in your portfolio.

10. Press the ACTION BUTTON to execute your sell order. Your shares will be sold in lots of 100. You can sell some of them or all of them at this time.

The news flashes at the center of the screen will be replaced by a display showing the changing balance in your portfolio.

The transaction is recorded on your investment record pad. See page 13.

Important: If one player is making a transaction and another player signals for computer access by moving the joystick of the hand control, the transacting player has a ten second grace period to complete the buy or sell order before the other player's portfolio will be displayed on the screen.

The news flashes will not be displayed when a portfolio is scrolled to an open account or when a buying or selling transaction is being executed. The news will automatically be redisplayed when a transaction is completed or when both portfolios are scrolled to the #1 Account Balance position.

Level One STRAIGHT INVESTMENT TRANSACTIONS

Investment Positions:

Player one's investment of WHL in open account 2 is recorded by placing the appropriate share token in the SHARE section of the gameboard.

The Gameboard

1. The gameboard is divided into four sections.

- A.** Investment positions.
- B.** T-Bill market.
- C.** Time frame indicator.
- D.** Prime rate indicator.

2. Each investor or syndicate receives a set of numbered share/margin tokens at the beginning of the game. When a straight investment transaction is entered into the computer, place a share token with the \$ sign up in the SHARE section of the gameboard. The appropriate investment should correspond with the account in the portfolio which holds the buy. This system provides a quick reference to all of the accounts in the portfolios.

Investment sensitivities are indicated on the gameboard by color coded bars in 3 areas:

3. Every investment in the game has a different sensitivity to changing national and international conditions in three areas.

A. Gross National Product (GNP):

The total amount of goods and services produced by the entire country during one year.

B. Prime Interest Rate:

The interest rate banks quote as charging their best corporate customers.

C. Political Instability:

Including national legislation and international friction.

The relative sensitivity to every investment in the game is graphically illustrated by the bar charts on the gameboard. For example, SRS (Sears) is highly sensitive to changes in the prime interest rate and far less affected by political events.

News flashes can have positive or negative influence on a player's investment.

The Time Frame Indicator divides play into 20 quarters (5 years).

The gold token shows the annual prime rate to be 11% at the start of the quarter. The silver token shows a rise to 13% during the quarter.

4. The news flashes indicate events which can have positive or negative effects on the GNP, Prime Interest Rate and the international political scene.

5. The computer will change the price of each investment up or down according to its sensitivity to the events reported by the news bulletins. Important: If a stock's price falls to 00, it will remain there for the duration of the game.

6. The Time Frame Indicator on the gameboard is divided into twenty quarters. (Five years.) The Time Frame Marker is placed on 1 at the beginning of each game and advanced to the next position at the end of each playing period.

The computer will signal the end of a period by freezing prices, halting trade and scrolling each portfolio of investments. The computer will automatically halt to call your attention to an investment which has suffered a loss during the quarter. Push the joystick of the appropriate hand control to continue scrolling action.

7. The Prime Rate Indicator will perform an important function in game levels two through four. It keeps track of the interest banks quote as charging their best corporate customers.

8. There are two prime rate tokens. The gold token is used to mark the annual prime rate existing at the beginning of a quarter.

The silver token is used to track fluctuations in the prime rate during the quarter. These changes in the prime rate will be reported by the news bulletins on your TV screen. The tokens are moved around the outer numbers which give the prime rate on an annual basis. The inner numbers give the prime rate on a quarterly basis.

Important: The prime rate cannot fall below 7% annually on the game board.

At the start of the game, set both tokens at the prevailing prime rate as quoted in the financial pages of your newspaper—or at 11%. Changes in the prime rate will be reported by the news flashes.

9. Keep careful track of changes in the prime rate. It has a direct effect on investment prices. It is used to determine the rate of return on Treasury Bills.

10. The investor or investment syndicate with the greatest net worth at the end of the game wins.

WHEN YOU ARE THOROUGHLY FAMILIAR WITH THE WORKINGS OF LEVEL ONE, YOU ARE READY TO GO TO LEVEL TWO.

	7	13	14	15
ANNUAL PRIME RATE	7	13	14	15
ANNUAL T-BILL RATE	6	11	12	13
QUARTERLY T-BILL	.015	.028	.03	.033

[illegible]

- 6. Use the investment record pad** to keep track of your transactions and to maintain a constant update of your net worth.
- 7. Record the buy on the Investment Record.** Deduct the amount of the T-Bill from the cash on hand section.
- 8. Add the principal plus interest to your cash on hand** at the end of the quarter.

See the examples on page 13.

Level Three
**STRAIGHT INVESTMENT
 TRANSACTIONS &
 TREASURY BILLS &
 BUYING ON MARGIN**

Up till now, all of your investments have been made for cash. If you wish, you can also buy stocks on margin. You are borrowing the money from your broker to buy the stocks.

There is a 50% margin requirement in the game. This means that **the amount of the loan can never exceed ½ of the CURRENT market price of the stocks.**

Here's an example: Suppose you want to invest \$5,000. in a stock selling at \$50. a share. Under the margin rule, you can buy 200 shares of that stock instead of just 100 shares. Your \$5,000. in cash controls a \$10,000. investment. If the stock goes up five points, you earn a 20% profit instead of just 10% on your money. (The \$5,000. is deducted from your cash on hand.)

If the stock goes down, a margin call will occur at the end of the quarter. You then must pay back the broker the difference between the amount of the loan and the **current** market price of the investment.

You bought 200 shares @ \$50. = \$10,000. (\$5,000. was your money. You borrowed \$5,000. from your broker.)

During the quarter, the stock fell to \$40. a share. 200 shares @ \$40. = \$8,000.

Since you still owe your broker \$5,000., your equity has, therefore, been reduced to \$3,000.

**Market value of stocks: \$8,000.
 Broker loan: -5,000.**

Your equity: \$3,000.

You must now send your broker \$1,000. (by subtracting from your cash on hand) to cover the 50% margin requirement of the current market value of your stocks. This increases your equity to \$4,000.

**Market value of stocks: \$8,000.
 Broker loan: -4,000.
 Your equity: \$4,000.
 \$4,000. is = 50% of \$8,000., and the 50% margin requirement has been restored.**

To put it another way: a margin loan can be no greater than your current equity in the margined stocks. Your equity is equal to the current price of the stocks less the loan.

You must pay interest on the money you are borrowing, which is due every quarter. The rate is 1% over the prime rate effective at the end of the quarter. (Add 1% to the annual prime rate at the outer rim of the prime rate indicator. Use the inner quarterly figure to compute the interest.) Subtract this from your cash on hand.

1. To Buy An Investment On Margin, announce how many shares of stock you are buying on margin.

2. Enter half the amount into a channel of your computerized portfolio through the keyboard. Deduct the price you paid in cash from your cash on hand.

3. Place margin token (M side up) on the Share Section of the investment on the gameboard. The M signals an investment bought on margin.

4. At the end of the quarter, the computer will scroll each account in both portfolios.

5. If a loss has occurred in an account, the computer will stop in that position to make a margin call.

You must reduce your broker loan by deducting the amount of cash from your cash on hand to restore the 50%/50% balance between your equity in the stocks and your loan from your broker.

You may sell securities to accomplish this. Remember—your broker loan can be no more than ½ of the market price of the stock at the end of the quarter.

Push the joystick of the hand control to resume scrolling.

6. If a margin call cannot be met, an investor is bankrupt and out of the game.

7. Margined stocks may be sold to meet margin calls.

8. Interest on margin accounts must be paid at the end of each quarter and is deducted from net worth. Interest is computed from the Prime Rate indicated on the gameboard plus 1%.

$$\frac{(\text{Prime Rate} + 1\%)}{4} = \text{Quarterly Interest}$$

Example: An investor has borrowed \$5,000. on margin. The prime rate is 11%.

$$\$10,000. \times \left(\frac{11\% + 1\% = 12\%}{4} = 3\% \right)$$

The interest rate for the quarter is 3%.

\$150 (3% of \$5,000.) is deducted from the investor's net worth.

If you sell a margined stock, add the selling price to your cash on hand. Deduct the loss or add the profit to your net worth.

Important: You must pay back the broker loan plus interest at this time by deducting it from your cash on hand. TAKE YOUR TIME AND WHEN YOU FEEL COMFORTABLE WITH MARGIN TRADING, YOU ARE READY TO PROCEED TO THE FOURTH LEVEL.

Level Four
**STRAIGHT INVESTMENT
TRANSACTIONS &
TREASURY BILLS &
BUYING ON MARGIN &
STOCK OPTIONS**

Ninety day options give the buyer the right—but not the obligation—to buy or sell securities at current prices at the beginning of the following quarter. Options offer the opportunity to realize a potentially large profit from a relatively small investment at a known risk. The most you can lose is the price you pay for the options.

Option trades are not entered into the computer.

Call Options

A call option gives you the right to **buy** a security at a predetermined price at the beginning of the following quarter. You are buying the right to “call away” a specific number of shares of the underlying security at a specified price at a predetermined time in the future. **You are betting that the price of the security will rise.**

Put Options

A put option is a contract for the right to **sell** a specific number of shares of a given security at a specified price at the beginning of the following quarter. **You are betting that the price of the security will fall.**

1. Options are available only at the beginning of each quarter.

The Time Frame Indicator shows the game is in the first quarter of the second year.

HANDBOOK OF COMMON STOCKS

ABC

American Broadcasting Companies, Inc. operates in broadcasting, recorded music and publishing. It licenses, produces and acquires entertainment and sports programming for its network of more than 200 affiliated television stations. Five are company-owned. The radio division includes 1596 affiliated radio stations and 14 AM and FM stations which are owned by the company. They also own a number of magazines including Modern Photography, High Fidelity and Los Angeles.

AET

Aetna Life & Casualty Company is the world's largest "multiple line" insurance firm. It markets virtually all forms of insurance including life, health, accident, auto, boat, plane, home, office, factory, etc. There were about 35 million Aetna policies in force at the end of 1979. Its primary business is insurance, but the company is also involved in real estate, land development, business financing and investment management.

BDG

Bandag, Inc. manufactures pre-cured tread rubber, equipment and supplies for retreading tires. It also distributes and rebuilds vehicle replacement parts primarily for heavy-duty vehicles.

GPT

General Portland, Inc. is one of the largest U.S. manufacturers of Portland cement with a network of eight plants operating in Texas, Florida, Ohio, Tennessee, Kansas and California. The company also markets other construction materials and is involved in real estate development.

IBM

International Business Machines Corporation is the largest manufacturer of data processing equipment in the world. It sells, rents and services its products. About half its earnings are derived from its foreign operations. IBM dominates the market for computers and business typewriters. They also make dictating machines, electronic cash registers, photocopiers and word processors. It is the largest non-union company in the world.

JWL

Jewel Companies, Inc. operates more than 350 food stores throughout 17 states. Its Osco Drug Store division has 263 units. Other Jewel operations include White Hen Pantry convenience food stores and Brigham's ice cream and candy shops. Its Mass Feeding Corp. concentrates on frozen meal preparation and serves many schools participating in the Midwest and Atlantic states.

LOK

Lockheed Corporation is involved in the manufacture of the L-1011 TriStar, Jet Star II and the L-100 Hercules commercial aircraft. Its military planes include the C-140 Hercules, CP140 Aurora, S-3A Viking, P-3 Orion, C-141 Starlifter and the C-5 Galaxy. The company also manufactures Trident Ballistic missiles, special space systems, ocean going ships, air traffic control and radar systems, data handling devices, recorders and undersea petroleum systems. The U.S. Government is one of its largest customers.

MCD

McDonald's Corporation develops licenses, leases and services a nationwide chain of self-service restaurants. At the end of 1979, there were 5,747 units operating in the U.S. and another 890 units spread throughout Canada, Japan, Australia, Europe, Central America and the Caribbean.

MER

Merrill Lynch & Co., Inc. is the holding company of Merrill Lynch, Pierce, Fenner & Smith, Inc. It is the biggest factor in the business of brokering securities. Merrill Lynch also brokers commodity futures contracts and deals in corporate securities, municipal securities, U.S. Government agency obligations and investment banking. The company is also involved in real estate financing, investment counseling, economic counseling and life insurance. Merrill Lynch has 382 offices in the U.S. and other offices spread throughout 28 other countries.

MTC

Monsanto Company is a leader in chemicals and synthetic fibers. Its lines include agricultural products, chemical intermediates, industrial chemicals, plastics, resins, textiles, pharmaceuticals, textile and paper chemicals, heavy chemicals and electronic controls.

MYG

The Maytag Company is the third largest U.S. maker of home laundry appliances. Its products include electrically operated washing machines, automatic washers and both gas and electric dryers. It also makes coin-operated washing machines and dryers, dishwashers and food waste disposers.

NEE

New England Electric System is the parent of an electric utility system which owns three retail electric operating companies, a wholesale generating company, a fuel company and a service company. It sells electricity to more than one million customers in Massachusetts, Rhode Island and New Hampshire.

NME

National Medical Enterprises, Inc. owns, operates or manages hospitals, nursing facilities and home health care agencies. It also offers a wide variety of services to other health care facilities in the U.S.

PAG

Proctor & Gamble Company is the biggest U.S. manufacturer of soap and detergent and a leader in packaged shortening. It also makes household paper products and industrial pulp products. Important P & G brands include Ivory, Dash, Spic and Span and Tide cleaning compounds, Crisco and Fluffo shortenings, Crest and Gleem toothpastes, Prell and Head and Shoulders Shampoos and Folger coffee. The company has a very large international operation.

SLZ

Jos. Schlitz Brewing Company operates seven breweries producing Schlitz Beer, Old Milwaukee Beer, Schlitz Malt Liquor, Schlitz Light Beer and Erlanger Beer. The company is also involved in animal feeds and feed concentrates, the growing and processing of ducklings and producing California table wines.

SMC

A. O. Smith Corporation is the world's largest maker of truck and automobile frames, the biggest U.S. producer of fiber glass reinforced plastic pipe and the major manufacturer of automated animal waste storage systems. Other A. O. Smith products include water heating equipment and electric motors for water systems, air-conditioning and refrigeration.

SOI

Standard Oil Company (Indiana) is the sixth largest U.S. based oil company. It is heavily involved in crude oil and natural gas exploration, production, purchasing and transporting. It also markets petroleum products, chemicals, plastics and fertilizers. The company has other interests in minerals and real estate. It is active in more than 40 countries throughout the world.

SRS

Sears, Roebuck & Company is the largest retail-mail order chain. It employs nearly 500,000 people—that's one out of every 200 working people in the United States. One out of every three families has a Sears credit card. The company also owns the Allstate Insurance Co. and Sears, Roebuck Acceptance Corp. Its Seraco group invests, develops and operates real estate and performs financial services.

TEX

Texas Instruments, Incorporated develops, manufactures and sells products in the electrical and electronics industry to the industrial, consumer and government markets. Its component products include semiconductors as well as electrical and electronic controls. Digital products include mini-computers, data terminals, electronic calculators and watches. Government products include radar, infra-red surveillance systems as well as missile guidance and control systems. The company also produces metallurgical materials for automotive, appliances and telecommunications. In addition, it collects and electronically processes seismic data for petroleum exploration.

TOY

Toyota Motor is the largest automobile manufacturer in Japan and has 25 overseas plants. They export about 40% of their output and are advancing into the housing industry.

TWA

Trans World Corporation is the parent company of Trans World Airlines which currently flies to and from 42 cities in the continental United States and 19 cities in Europe, Africa and the Middle East. The corporation also owns Hilton International (hotels), Canteen Corporation (food service), Spartan Food Systems and Century 21 Real Estate Corp.

USH

U.S. Home Corporation has 41 divisions which maintain 234 communities in 15 states. It is the leading on-site manufacturer of single family homes in the country. The corporation produces detached homes, townhouses and low-rise condominiums. It also sells lumber, millwork and concrete.

USS

United States Steel Corporation is the largest American steel company and accounted for almost 23% of the entire industry's output in 1979. It also owns or leases coal, limestone and iron ore properties.

WHL

Western Holdings Limited is the operator of a large gold mine in the Orange Free State province of South Africa. In 1980, it produced close to a million ounces.

WFB

Wells Fargo & Company is a holding company. Its principal subsidiary is Wells Fargo Bank, N.A. which has 374 offices in California. It offers a broad range of services including traditional deposits and loans, real estate loans as well as trust and investment services.

WOW

Wildcat Oil Western represents companies engaged in natural resource exploration and production. It operates in ocean transportation, crude oil, finished petroleum marketing and real estate. Wildcat Oil Western has facilities in Indonesia, the North Sea, Egypt, Canada and the U.S.

XON

Exxon Corporation is the biggest oil company in the world. About one-half of Exxon's daily production comes from the Middle East and Africa. Interests are also held in deposits on the North Slope, the North Sea and the Baltimore Canyon. It is also heavily involved in chemicals.

The Great Wall Street Fortune Hunt

"The Great Wall Street Fortune Hunt" was developed and produced by the Odyssey Division of the North American Philips Consumer Electronics Corporation. It is one in a new series of Videopac board games, giving an unusually realistic impression of what goes on in the modern stock market.

For practical purposes these games have been imported in their original packaging, with the American instructions for use. We trust that the text will not present any serious problems for you. For the benefit of non-English speaking people, as you will see, we have included a summary of some of the specific terms and phrases used in this game.

We trust that you will find this a fascinating game and hope you will "get rich", playing it!

Das grosse Wall Street Glückspiel

Das große Wall Street Glückspiel wurde von der Odyssey Division der North American Philips Consumer Electronics Corporation entwickelt und hergestellt. Es ist Bestandteil der neuen Serie von Philips Videospiel G 7000 "Brettspielen", und vermittelt einen außerordentlich realistischen Eindruck von den Vorgängen an einer modernen Wertpapierbörse.

Aus praktischen Gründen werden diese Spiele in ihrer Original-Verpackung und mit englischer Bedienungsanleitung geliefert. Zu Ihrer Orientierung fügen wir eine Liste mit der Übersetzung der Fachausdrücke und speziellen-Sätzen bei, die an der Wertpapierbörse üblich sind sowie eine Zusammenfassung der verschiedenen Einblendungen, die während eines Spiels auf Ihrem Bildschirm auftauchen. Die meisten der Nachrichten wirken sich unmittelbar auf die Börse aus.

Wir zweifeln nicht daran, daß Sie dieses Spiel fesseln wird und hoffen, daß Sie beim Spielen "reich" werden.

Zusammenfassung der eingeblendeten Nachrichten, die während des Spiels auf dem Bildschirm erscheinen:

The Great Wall Street Fortune Hunt

«The Great Wall Street Fortune Hunt» est un jeu unique, qui a été développé par la division Odyssey de la North American Philips Consumer Electronics Division. Troisième jeu de la nouvelle série de jeux de société Videopac Philips, il est le reflet remarquablement réaliste de ce qui se passe dans le monde boursier.

Pour des raisons pratiques, ce jeu a été importé dans son conditionnement original américain, mode d'emploi américain compris. Pour que vous vous y retrouviez, nous avons réuni ci-après les termes et expressions spécialisés. Ils sont affichés à l'écran, suivis de la traduction en français.

Un jeu fascinant, qui vous plongera des heures durant dans le monde déconcertant de la fortune éffrénée ou du krach inéluctable.

Aperçu des nouvelles affichées à l'écran

Bank loan demand down
Demande de crédit bancaire en baisse.

Prime rate up 1 point

The Great Wall Street Fortune Hunt

"The Great Wall Street Fortune Hunt" is een uniek spel, dat ontwikkeld werd door de "Odyssey Divisie" van de "North American Philips Consumer Electronics Corporation". Het derde spel in een nieuwe serie Videopac bordspellen van Philips. Het geeft een bijzonder realistisch beeld van al wat er in de beurswereld gebeurt.

Het spel wordt, om praktische redenen, in zijn originele Amerikaanse verpakking geïmporteerd met daarbij dus ook de Amerikaanse gebruiksaanwijzing. Om u een beetje wegwijs te maken, geven wij u hierbij een overzicht van de gebezigde vaktermen en de teksten, die op het beeldscherm verschijnen met hun Nederlandse vertalingen.

Het is een fascinerend spel, dat u ongetwijfeld vele uren bezig zal houden, terwijl u probeert een fortuin te vergaren!

Overzicht van de nieuwsberichten, die op het beeldscherm verschijnen

Bank loan demand down

Vraag naar bancaire krediet is gedaald

Prime rate up 1 point

Prolongatierente is met 1 procent verhoogd

Major offshore oil discovery in Lake Michigan

Belangrijke olievondst in Lake Michigan

President orders audit of budget cuts

President geeft opdracht tot controle op begrotingsbezuinigingen

Mass corporate tax cut passes senate

Aanzienlijke verlaging van vennootschapsbelasting door de senaat aangenomen

Hike in personal income tax planned

Plannen voor een belangrijke verhoging van de inkomstenbelasting

Electronic foot massagers increase worker productivity

Elektronische apparaten voor voetmassage verhogen de arbeidsproductiviteit

Frost hits South East

Vorst slaat hard toe in het zuidoosten

Threeday workweek cuts industrial output

Driedaagse werkweek verlaagt industriële productie

Nationwide strike threat

Massale, landelijke staking dreigt

Cabinet shake-up rumored

Geruchten over ingrijpende wijzigingen in samenstelling van het kabinet

Foreign governments withdraw US bank holdings

Buitenlandse regeringen trekken banktegoeden terug

NATO members reach agreement

NAVO leden bereiken overeenstemming

Fair weather predicted for White House Easter egg hunt

Mooi weer voorspeld voor het zoeken naar paaseieren bij het Witte Huis

Unrest brewing in Latin America

Dreigende onrust in Latijns Amerika

La Grande Caccia alla Fortuna di Wall Street

"La grande caccia alla fortuna di Wall Street" è un gioco unico che è stato sviluppato dalla "Divisione Odessey" della "North American Philips Consumer Electronics Division". Il terzo gioco nella nuova serie di giochi Videopac a tavola della Philips. Fornisce una impressione molto realistica degli affari svolti nel mondo della Borsa.

Per motivi pratici, il gioco viene importato nella sua confezione originale americana e di conseguenza anche munito delle istruzioni americane. Per esservi alquanto di aiuto, elenchiamo i termini e testi professionali che appariranno sullo schermo completati dalle loro traduzioni italiane.

E' un gioco affascinante, che vi darà molte ore di divertimento mentre cercate di raccogliere una fortuna!

Elenco delle notizie che appariranno sullo schermo

Bank loan demand down

E' diminuita la domanda per il credito bancario

Prime rate up 1 point

La tassa di riporto è aumentata dell' 1 per cento

Major offshore oil discovery in Lake Michigan

Importante scoperta di petrolio in Lake Michigan

President orders audit of budget cuts

Il Presidente dà ordine di controllare i risparmi sul bilancio

Mass corporate tax cut passes senate

Diminuzione notevole della tassa sulle società approvata dal senato

Hike in personal income tax planned

Piani per un importante aumento dell'imposta sul reddito

Electronic foot massagers increase worker productivity

Apparecchiature elettroniche per massaggi ai piedi aumentano la produttività lavorativa

Frost hits South East

Il gelo si fa sentire molto nel sud-est

Threeday workweek cuts industrial output

La settimana lavorativa di tre giorni diminuisce la produzione industriale

Nationwide strike threat

Incombe uno sciopero nazionale di massa

Cabinet shake-up rumored

Voci su radicali modifiche nella composizione del governo

Foreign governments withdraw US bank holdings

Governi stranieri ritirano i crediti bancari

NATO members reach agreement

Membri della NAVO sono arrivati ad un accordo

Fair weather predicted for White House Easter egg hunt

Previsioni di bel tempo per cercare le uova di Pasqua presso la Casa Bianca

Unrest brewing in Latin America

Incombono agitazioni nell'America Latina

Japan and US agree on free trade

Giappone e Stati Uniti patuiscono un accordo sul commercio libero

Soviet and US accord nears

E' in vista un accordo tra l'Unione Sovietica e gli Stati Uniti

Bipartisan support for new free market plan

Una grande maggioranza nel parlamento per un nuovo piano per lo sviluppo del mercato libero

Rate of inflation 3 year high ... consumer prices rise

L'inflazione ha raggiunto il culmine a partire da tre anni ... aumenta l'indice del costo della vita

Federal reserve to cut money supply growth

La Banca Centrale vuole limitare l'ulteriore aumento della quantità di denaro

War threat in the Middle East

Incombe la guerra nel Medio Oriente

Børs-spillet (The Great Wall Street Fortune Hunt)

"The Great Wall Street Fortune Hunt" - på dansk kaldet "Børs-spillet" - er udviklet og produceret af den amerikanske Philips organisation, Odyssey Division. Det indgår i den nye serie Division. Det indgår i den nye serie Philips Videopac brætspil, og det giver et usædvanligt realistisk billede af, hvad der foregår på et moderne aktie-marked.

Spillet tilbydes med den amerikanske brugsanvisning. I det følgende er der en liste med oversættelse af de særlige udtryk og vendinger, der anvendes på det amerikanske aktie-marked. Der findes også et dansk resumé af de forskellige nyheds-informationer, der kommer til syne på skærmen i løbet af spillet. De fleste af disse "nyheder" har en øjeblikkelig indflydelse på aktie-markedet.

Der kan rekvireres en dansk brugsanvisning på Philips Service's salgskontor, Nyrnberggade 35, 2300 København S. Tlf. 01-57 22 22, lokal 3462.

Vi er overbeviste om, at du vil finde spillet fascinerende og håber du "bliver rig"!

Nyheds-informationer, der vises på skærmen i løbet af spillet:

Bank loan demand down

Faldende efterspørgsel på banklån

Prime rate up 1 point

Rentesatsen for udlån til 1. classes kunder stiger med 1 point

Prime rate down 1 point

Rentesatsen for udlån til 1. classes kunder falder med 1 point

Major offshore oil discovery in Lake Michigan

Stort oliefund i Lake Michigan

President orders additional budget cuts

Den amerikanske præsident giver meddelelse om yderligere budgetnedsækninger

Massive corporate tax cut passes senate

Omfattende nedsættelse af selskabsbeskatningen vedtaget i Senatet

Hike in personal income tax planned

Planer om stigning i den personlige indkomstbeskatning

Electronic foot massagers increase worker productivity

Elektroniske fod-massage-apparater resulterer i produktivitetsstigning i industrien

Frost hits Southeast

Kuldebølge rammer de Sydøstlige Forenede Stater

Three day workweek cuts industrial output

3-dages arbejdsuge medfører fald i den industrielle produktion

Nationwide strike threat

Trussel om landsomfattende strejke

Cabinet shake up rumored

Der går rygter om ændringer i kabinettet

Foreign governments withdraw U.S. bank holdings

Udenlandske regeringer trækker deres indestående ud af de amerikanske banker

NATO members reach agreement
NATO's medlemslande når til enighed

Fair weather predicted for White House Easter egg hunt

Meteorologerne forudsiger fint vejr til påskens "æggejagt" i Det Hvide Hus

Unrest brewing in Latin America

Det trækker op til uroligheder i Latinamerika

Japan and U.S. agree on free trade

Japan og U.S.A. enige om frihandel

Soviet and U.S. accord nears

Sovjet og U.S.A. nær ved at nå til enighed

Southeast Asian accord nears

Enighed på vej i Sydøstasien

Bipartisan support for new free market plan

To-parti støtte til ny frihandelsplan

Rate of inflation 3 year high ... consumer prices rise

Inflationsstigningen er den højeste i 3 år - priserne på forbrugsgoder stiger

Federal Reserve to cut money supply growth

Federal Reserve (Centralbanken i U.S.A.) vil nedsætte væksten i pengeforsyningen

War threat in the Middle East

Krigstrusler i Det mellemste Østen

Investerings- spelet "Wall Street"

Videopac No. 46 "Wall Street" har utvecklats och tillverkas av amerikanska Philips' Odyssey-division. (Odyssey = namnet i U.S.A. på 7000 speldator). Du deltar på ett realistiskt och fängslande sätt på dagens börsmarknad i U.S.A. "Wall Street" ingår i den amerikanska TV-spelsserien "The Master Strategy Games".

Spelet levereras i sin originalförpackning med amerikanska spelregler. För att underlätta tolkningen bifogas en förteckning med svensk översättning av de speciella termer och uttryck som tillämpas på den amerikanska börsmarknaden och som förekommer i spelet. Dessutom har vi översatt de nyhetsbulletiner som dyker upp på TV-rutan under spelets gång. De flesta av dem ger direkt utslag på börsmarknaden.

"Wall Street" är ett fascinerande TV-dataspel för familjen och för företag som vill träna lagspel. Vi hoppas att alla "blir rika" på kuppen!

Sammandrag av nyhetsbulletinerna på TV-rutan under spelets gång

Bank loan demand down
Efterfrågan på banklån minskar

Prime rate up 1 point
Räntan upp 1 %

Wall Streetillä onnea etsimässä

"The Great Wall Street Fortune Hunt"-pelin on kehittänyt North American Philips Consumer Electronics Corporationin Odyssey Division. Se kuuluu Philipsin uusiin Videopac-lautapeleihin ja se antaa hämmästyttävän todentuntuisen vaikutelman nykypäivän pörssikaupan tapahtumista.

Käytännön syistä tämä peli myydään alkuperäisenä versiona amerikkalaisine käyttöohjeineen. Olemme kuitenkin kääntäneet avuksi lyhyen luettelon pörssitermeistä ja sanonnoista sekä kuvaruudussa pelin aikana näkyvistä uutisista. Useimmat näistä uutisista vaikuttavat välittömästi arvopaperimarkkinoihin.

Toivomme että viihdyt tämän kiehtovan pelin parissa ja että onnistut "rikastumaan"!

Kuvaruudussa pelin aikana näkyvät uutiset

Bank loan demand down
Pankkilainaus laskee

Prime rate up 1 point
Prime-korko nousee 1 askeleen

Prime rate down 1 point
Prime-korko laskee 1 askeleen

A la Caza de la Fortuna de Wall Street

Este juego ha sido proyectado y producido por la división Odyssey de la North American Philips Consumer Electronics Corporation, y es uno de la nueva serie de juegos de tablero Videopac, que proporciona una visión de lo más real que darse pueda de lo que sucede en el mercado moderno de valores.

Por razones de tipo práctico, estos juegos se han importado con su embalaje original y el modo de empleo americano. Para facilitarles su manejo hemos incluido una lista de traducciones de términos y frases específicos, utilizados en el mercado americano de valores, así como un resumen de las distintas noticias que pueden aparecer en la pantalla durante el juego. La mayoría de esas noticias tienen un efecto inmediato en el mercado de valores.

Esperamos que encuentren fascinante este juego y deseamos que "se hagan ricos" jugando con él.

Resumen de las noticias que aparecen en la pantalla durante el juego:

Bank loan demand down
Baja la demanda de préstamos bancarios

Prime rate up 1 point
El tipo de descuento sube 1 punto

Prime rate down 1 point
El tipo de descuento baja 1 punto

Major offshore oil discovery in Lake Michigan

Importante yacimiento de petróleo descubierto en el Lago Michigan

President orders additional budget cuts
